

PRODUCT SPECIFICATION SHEET

ACOUSTIC DISC

MODEL SM-TD-1300

SPECIFICATIONS

Model	SM-TD-1300
Materials	ABS plastic
Dimensions	345 x 40 mm
Weight	0.15 kg
Colours	Black or White
Compliance	 UL94.V-0. Manufactured to ISO 9001:2000

DESIGN FEATURES

Soundmask's Acoustic Disc can be used in an open area or where there are no reflective surfaces, for example in green buildings where thermal or sound absorbent materials are applied to the underside soffit of the structural ceiling.

The disc has been specifically designed to reflect sound evenly throughout the space. When positioned above the suspended transducer, Soundmask's acoustic disc opens up the grid and enhances sound distribution throughout the system.

The disc is used with Soundmask's SM-T-1200 transducer in matching black or white colour.
